

Engineering Excellence J1

(Weekly Health report)

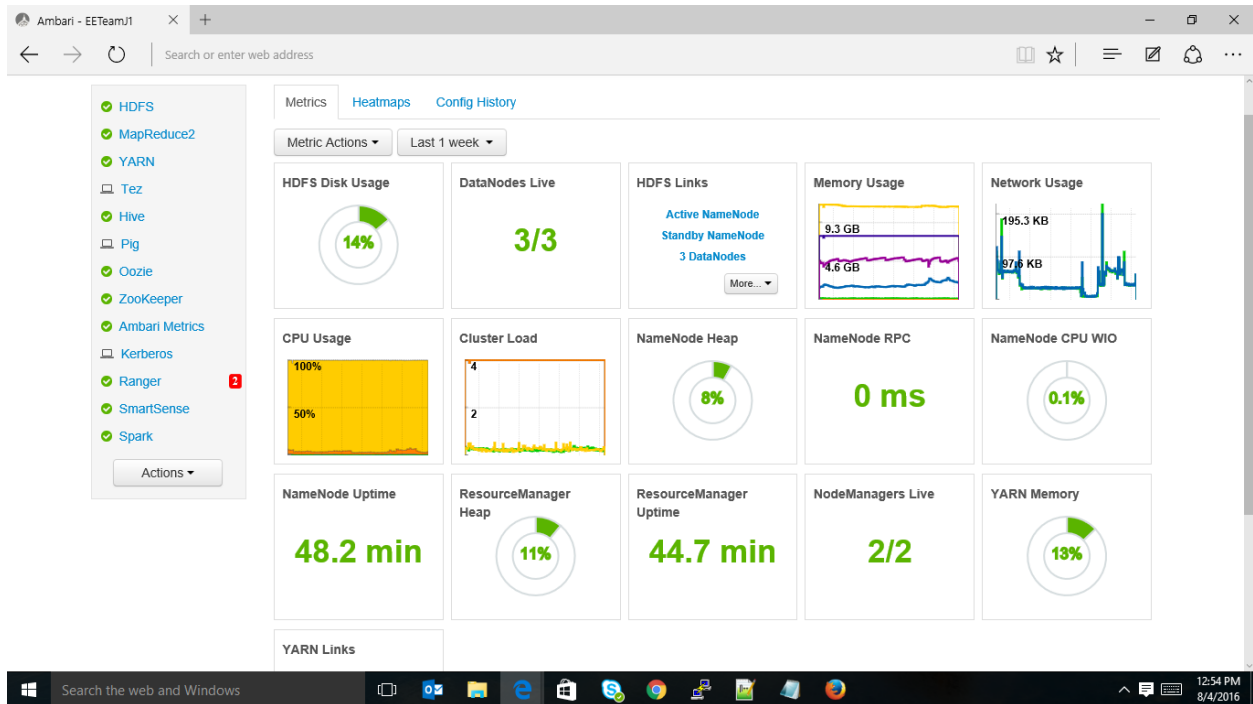

Index

- **Ambari Metrics System**.....2
- Memory/cpu uses of cluster.....3
- Email notification.....4

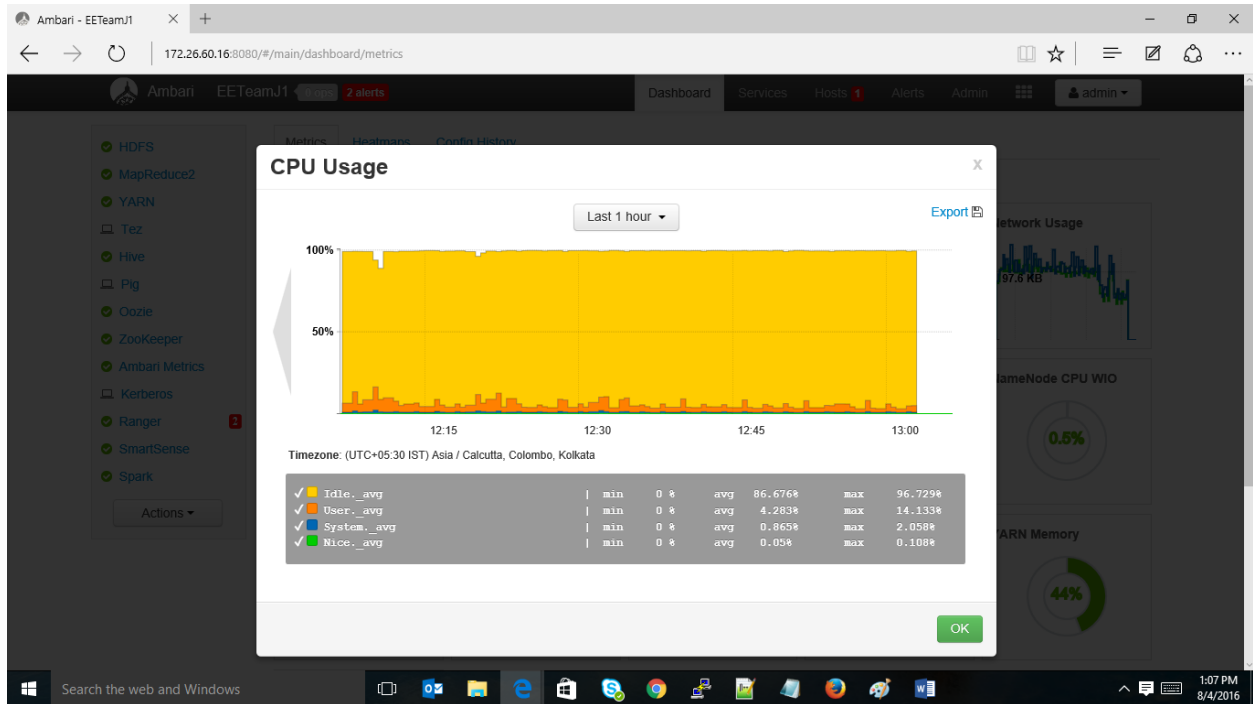

For weekly/hourly health report of cluster we have configured the Nagios and Ambari Metrix.

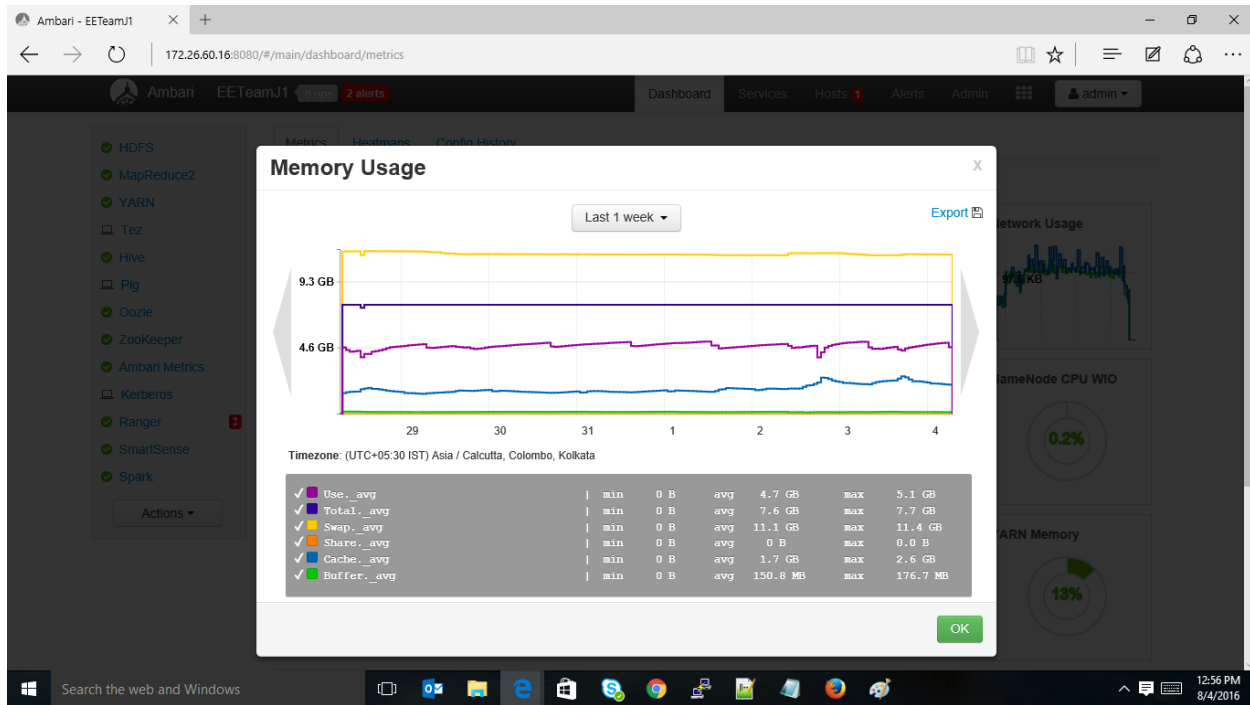

Nagios is used for ...

Ambari Metrics System ("AMS") is a system for collecting, aggregating and serving Hadoop and system metrics in Ambari-managed clusters. This is built-in metrics collection system for **Ambari**.

We can also see the memory/cpu uses of cluster:-

Also the email notification were configured:-

Ambari - EETeamJ1
